

Spot the Differences

BEVERAGES

A

B

Teacher's Key

Talkmor Suggestion: In a small class this can be a teacher-student activity and in a bigger class, it should be a **Student A - Student B** activity.

Let your students sit in pairs, facing each other. Give the handouts to each pair - Student A receives both pictures and Student B, the same. Student A needs to find one difference and tell that to Student B, i.e. *In picture A, there's a cat on the table. In Picture B, there's no cat on the table.* Student B does exactly the same. Each student describes one difference at a time until all 10 differences have been found. Duration 15-20 minutes.
