1. Spot the Differences

Work with a partner.

Student A: Look only at Picture A.

Student B: Look only at Picture B.

Do not show each other your picture.

Take turns asking questions.

- Is there a red bus?
- Where is the yellow car?
- How many motorcycles can you see?
- What is next to the school?
- Is the train the same in both pictures?

Try to find at least 8 differences.

2. Describe It!

Choose one vehicle from the picture and describe it without saying its name.

Tell your partner:

- what it looks like
- how many wheels it has
- where it is
- what people use it for
- whether you use one regularly

Your partner guesses the vehicle.

3. Transport Problems

What can happen when people use public transport?

Complete the ideas.

The bus is late because...

The train is crowded because...

I missed the bus because...

There was a traffic jam because...

I couldn't find the station because...

Compare your answers with a partner.

4. Opinion Time

Which is better for a city?

Buses • Trains • Subway • Bicycles • Cars

Choose one and give **two reasons**.
