drip

dripping

eat your ice cream

dessert

freeze

freezer

ice cream stand

etc.

## The History of Ice Cream

The first ice cream-like food was found in China more than 1,000 years ago.

It was made of buffalo or goat milk and flour.

Many years later, travelers who visited China, saw how they made their “iced desserts” and took the idea back to Europe.

It became very popular in Europe and the Italians introduced the first frozen iced dessert.

Ice cream is one of the most loved desserts in the world. People love the creamy, sweet taste of ice cream. It is delicious and it is made from dairy products such as milk and cream, eggs, sugar, and some tasty powders. Ice cream can also be made from fruits, vegetables, and milk instead of sugar.
