

WAYS TO SAVE THE BEES

<https://thebeeconservancy.org/10-ways-to-save-the-bees/>

Choose The Correct Heading For Each Paragraph

Provide Trees for Bees	Plant a Bee Garden
Create a Bee Bath	Go Chemical-Free for Bees

1. _____

One of the largest threats to bees is a lack of safe habitat where they can build homes and find a variety of nutritious food sources. By planting a bee garden, you can create a habitat with plants that are rich in pollen and nectar. You don't need a lot of space to grow bee-friendly plants — gardens can be established across yards and in window boxes, flower pots, and planters.

2. _____

Avoid treating your garden and green spaces with pesticides and fertilizers. Instead, use organic products and natural solutions such as compost to aid soil health and add beneficial insects that keep pests away like ladybugs and praying mantises.

3. _____

Did you know that bees get most of their nectar from trees? When a tree blooms, it provides hundreds — if not thousands — of blossoms to feed from. Trees are not only a great food source for bees but also an essential habitat.

4. _____

Bees work up quite a thirst searching and collecting nectar. Fill a shallow bird bath or bowl with clean water, and arrange pebbles and stones inside so that they break the water's surface. Bees will land on the stones and pebbles to take a long, refreshing drink.

=====

Fill the blank with pronouns, possessive pronouns, and possessive adjectives

Michelle, the beekeeper, carefully inspected _____ (1) beehives, making sure _____ (2) were healthy. _____ (3) checked each hive, ensuring the queen bee was laying eggs in _____ (4) chamber. The worker bees were busy collecting nectar from flowers, storing it in _____ (5) honeycomb cells. Meanwhile, the drones were lounging in the sun, enjoying _____ (6) lazy morning. The beekeeper smiled, knowing _____ (7) bees were thriving. _____ (8) took pride in _____ (9) honey, which was renowned for its rich flavor.

Teacher's Key

1. Plant a Bee Garden

One of the largest threats to bees is a lack of safe habitat where they can build homes and find a variety of nutritious food sources. By planting a bee garden, you can create a habitat with plants that are rich in pollen and nectar. You don't need a lot of space to grow bee-friendly plants — gardens can be established across yards and in window boxes, flower pots, and planters.

2. Go Chemical-Free for Bees

Avoid treating your garden and green spaces with pesticides and fertilizers. Instead, use organic products and natural solutions such as compost to aid soil health and add beneficial insects that keep pests away like ladybugs and praying mantises.

3. Provide Trees for Bees

Did you know that bees get most of their nectar from trees? When a tree blooms, it provides hundreds — if not thousands — of blossoms to feed from. Trees are not only a great food source for bees but also an essential habitat.

4. Create a Bee Bath

Bees work up quite a thirst searching and collecting nectar. Fill a shallow bird bath or bowl with clean water, and arrange pebbles and stones inside so that they break the water's surface. Bees will land on the stones and pebbles to take a long, refreshing drink.
