Dear Phone Loser Priya,

Haha, I can already imagine you patting your pockets and turning your bag upside down! 😂

Third time this month? Girl, you're giving "phone loss champion" energy at this point!

Don't worry — this happens to so many teenagers. Phones are slippery little things. One second they're in your hand, the next second they've disappeared like magic.

The truth (with a smile):

- Most people lose their phones because they're distracted or in a hurry.
- The panic you feel makes it even harder to remember where you left it.
- Your mom is probably more worried about your safety than the phone itself.
- Losing your phone also means losing photos, messages, and all your apps — that's why it feels so stressful.

My advice (Let's make this stop happening!):

- Always put your phone in the **same pocket or bag spot** — create a "phone home".
- Turn on **Find My Phone** (or the Android version) right now — it can show you the location.
- Before you leave any place (café, bus, classroom, friend's house), do the "Phone Check": stop, look, touch your pocket.
- Use a **bright phone case** or attach a small keychain so it's easier to spot.
- If you lose it again, stay calm for 2 minutes and retrace your steps — it usually works!

You've got this, Priya! One or two small habits and you'll break this losing streak. And hey... at least it makes for good stories later! 😂
