

## CYCLING & BICYCLES

© [talkmor.com](http://talkmor.com)

### Look Beyond the Bicycle

Study the pictures.

Don't just name objects.

Discuss:

- What kind of people might use these bicycles?
- Where might they be going?
- What might they be carrying?
- What can you tell from their clothes?
- What might happen next?

### The Difference Challenge

Find all 10 differences.

Now choose the three most important differences.

Explain why you think they are important.

### Cycling Problems

Your bicycle has a problem during a long ride.

Put these steps in the best order:

**find help • stop safely • check the problem • repair it • call someone**

Explain your choices.

### Cars or Bicycles?

Complete the table.

|                    | Bicycle | Car |
|--------------------|---------|-----|
| <b>Cost</b>        |         |     |
| <b>Exercise</b>    |         |     |
| <b>Speed</b>       |         |     |
| <b>Parking</b>     |         |     |
| <b>Environment</b> |         |     |
| <b>Convenience</b> |         |     |

Which is better for short journeys?

Explain.

### Plan a Cycling Trip

You and your friend have one free Saturday.

Plan a cycling trip.

**Decide:**

- Where?
- How far?
- What will you take?
- Where will you stop?
- What could go wrong?

Present your plan to another pair.

### Choose One

- puncture
- broken chain
- flat tyre
- broken brake
- no lights
- lost bicycle lock

What would you do?
