

CYCLING & BICYCLES

© talkmor.com

The City Council Meeting

You are members of a city council.

The proposal:

“Our city should remove some car parking spaces and build protected bicycle lanes.”

Different people have different opinions.

Choose a role:

- shop owner
- city planner
- environmental campaigner
- cyclist
- driver
- parent

Prepare your argument.

Then hold the meeting.

The Bicycle of the Future

Design a bicycle for **2040**.

What will it have?

Think about:

- safety
- technology
- comfort
- energy
- storage
- communication

Give your bicycle a name.

Present it to the class.

Solve the Problem

A city introduces bicycle lanes.

Six months later:

- some drivers complain
- some cyclists say the lanes are too narrow
- shop owners say customers have less parking
- pedestrians complain about bicycles on pavements

You are the city planning team.

What changes would you make?

Take a Position

Choose AGREE or DISAGREE.

1. Cycling is one of the best forms of transport in a city.
2. Professional cyclists make cycling look more dangerous than it really is.
3. Governments should encourage people to cycle instead of driving.
4. Electric bicycles will change the future of cycling.

Give a reason for every answer.

Magazine Challenge

Write the opening of a magazine article:

The Bicycle Is Back

Why are bicycles becoming important again in many places?

Think about:

- cities
- health
- technology
- climate
- cost
- lifestyle
