

TECHNOLOGY & SMARTPHONES

© talkmor.com

1. Technology Choices

Discuss each question.

1. Would you rather have a new smartphone or a new laptop?
2. Which is more important: a good camera or a long battery life?
3. Would you pay more for a phone without advertising?
4. Is it better to buy expensive technology that lasts longer?
5. Should children have smartphones?
6. Should people switch off their phones sometimes?

Give reasons for your answers.

2. Solve the Problem

Read the situation.

You are going on a two-week holiday. You have your smartphone, but you will have limited internet access.

Together, decide how you will:

- communicate
- find your way
- book accommodation
- get travel information
- take photos
- keep important information safe

What apps or technology would you use?

3. The Technology of the Future

Imagine it is **2035**.

Discuss:

How will technology change...

- work?
- education?
- travel?
- shopping?
- communication?
- healthcare?
- entertainment?

Use:

I think...

I imagine...

Maybe...

People might...

I don't think...

REAL ENGLISH BOX

When you aren't completely sure about a prediction, don't say:

"This will definitely happen."

Try:

"I think it might..."

"It's possible that..."

"I wouldn't be surprised if..."

"Who knows? Maybe..."

This is useful everyday English for talking about the future.

4. Final Speaking Challenge – Design the Perfect Smartphone

You are going to design a new smartphone.

Together, decide:

Price: _____

Battery: _____

Camera: _____

Screen: _____

Special feature: _____

Apps: _____

One thing it will NOT have: _____

Now prepare a one-minute presentation.

Explain why your phone is better than existing smartphones.

Your partner can ask:

- "Why did you choose that?"
- "How much will it cost?"
- "What makes it special?"
- "Who would buy it?"

Final Self-Check

I can...

- ☐ talk about technology I use.
- ☐ describe my smartphone habits.
- ☐ give my opinion about technology.
- ☐ explain a technology problem.
- ☐ ask for technical help.
- ☐ suggest solutions.
- ☐ talk about future technology.
- ☐ have a conversation about smartphones.
