REAL ENGLISH

In the long term… / By 2040…

It might be possible to… if…

I'm not convinced that… will work because…

One realistic solution could be…

1. Speculating

Discuss:

1. Will electric cars solve the pollution problem? Why / why not?
2. Is nuclear energy part of the solution or part of the problem?
3. How will climate change affect daily life in your country in 20 years?

2. Group Challenge – Design a Greener City

In groups of 3–4:

You have 8 minutes to design one big improvement for your city.

Decide:

- What exactly will you change?
- Who will pay for it?
- What problems might people complain about?
- How will you persuade the public?

  Present your idea to the class (1–2 minutes).

3. Final reflection

What is the most realistic green change that could happen in your country in the next 10 years?
